BECOMING A PRINTFARM PRINT PARTNER

Onboarding guide to the Printfarm

Become a Printfarm partner in a few clicks — for this easy step by step guide.

1. Stripe Activation (3 min)

Before you sign up, we will send you a stripe link, which is our payment system.
Please click on the link and follow stripes instructions.
This step will activate your stripe account, and allow us to automatically send you the money.
Please make sure to enter correctly your bank details.

2. Printfarm account Activation (1 min)

Please go to the following link:
https://printfarm.metapaper.io and login with your Metapaper credentials.
This will activate your Printfarm account.

IMPORTANT
As soon as you have activated your stripe and Printfarm account, please let us know.
We will have to review and activate your account on our side.

Once all accounts are activated comes the last step; product configuration.

3. Product configurations (10 - 15 min)

This is the last step of the onboarding process. You will soon be a Printfarm partner.
Your account has been activated. You now need to configure the products you wish to sell on the platform.
Simply select / unselect the different products you wish to offer...and that's it!

Congratulations - you are now officially a Printfarm partner!
